

Howdy Vicki, happy to provide the endorsement I suggested giving when the job was completed, because they did a great job, as noted below.

My quote for a job well done: "We needed a carport concrete floor, and phoned several contractors including Schwerin Concreting for a quote. Schwerin visited, quoted, and promised a quick job starting and completed within the following week. That suited us just fine, so it was easy to accept their very competitive quote. I was impressed with the job and happy to pay on completion. It's been some months now, with no cracks or regrets. Schwerin Concreting will be the first I'll call the next concreting job I have."

cheers, John
