

Give your Concrete a Colour It Australia makeover!

stamp • stencil • topcrete • sealers • colour in the mix
for Domestic & Commercial Applications

TOPCRETE

C.I.A's most versatile, hard wearing, decorative concrete finish. Originally designed to beautify existing old plain concrete, Topcrete has evolved as an alternative for new projects.

The design and colour combinations are limited only by imagination. You can of course utilise our extensive range of stencil patterns, incorporate your company logo, or create your own design.

This system can cover all existing concrete (including exposed aggregate), masonry, and even bitumen. It adds only a few millimetres to the surface having little impact on door heights etc.

STAMPED CONCRETE

Imitates rock, slate, tiles and timber and more than 15 patterns available with unlimited colour combinations.

STENCIL CONCRETE

Imitates pavers, tiles, and stone work without the problems endemic of pavers, such as movement, ants and weeds growing between individual pavers.

Something to

IN THE MIX CONCRETE *available in 100's of colours*

'In The Mix' is an economical, labour saving method of colouring concrete. Utilising different colours formed into chosen designs can produce individual, modern and stunning areas to compliment any home, commercial premises, or to enhance any landscaped area. Concrete coloured this way is advantageous for architectural design, enhancing exposed aggregate, and the latest trend of polished concrete flooring.

C.I.A supplies quality full strength pigments produced to world standards and measured digitally to ensure accuracy and consistency. We can provide colour in fully disintegrating bags, in your selected colour in 1m³, 0.8m³, 0.6m³, 0.4m³, and 0.2m³ sizes. For individual purpose, we can supply down to 1kg or packaged to your requirements.

SEALERS

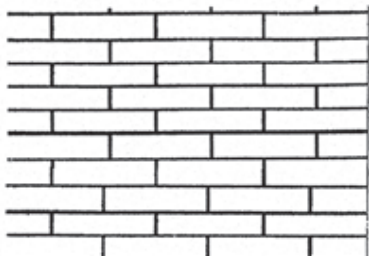

C.I.A manufactures and supplies a wide range of sealers to cover most applications. Ranging from high quality, economical, solvent based acrylics, to natural finish penetrating sealers to long lasting commercial grade polyurethanes. C.I.A sealers can be applied by broom, brush, roller, or solvent resistant sprayers.

Our Sealers can be tinted to a range of colours.
