

FAQ's

What is required by Law in Queensland?

- At least 1 smoke alarm is required on each level of a home.
- There must be a smoke alarm in any passageway or corridor leading to bedrooms.
- If a corridor or passageway does not lead to a bedroom, but could be an escape path, then a smoke alarm should be fitted in this path.
- In Queensland, all bedrooms should contain photoelectric smoke alarms.
- All smoke alarms in the home should be interconnected.

Why Brookes Smoke Alarms?

We exclusively use Brookes smoke alarms as the brand are the industry leaders in smoke alarm manufacturing, research and development.

Are they the best?

In our experience, without a doubt! We have previously used other common brands however we were having consistent issues with false alarming (Usually at night). Since switching to Brookes, we have had no such issues.

Are they Wireless?

Brookes photoelectric smoke alarms have full wireless capability in both their 240v and battery only models. These are used in situations where running wires may be costly and unsightly.

Are they compliant:

Of course! They are fully compliant to AS3786:2014 +A1:2015 +A2:2018

Why do they cost more?

As with anything, you get what you pay for. The quality of the Brookes alarms is outstanding, and we know your going to sleep better knowing you have the best protection available – without being woken up by false alarms!
